Project Name	Automated Network Request Management in ServiceNow

1. Purpose of Document

The purpose of this document is to evaluate and formally document the test execution, test coverage, and defect resolution for the Automated Network Request Management project on ServiceNow at the time of User Acceptance Testing (UAT) sign-off. The scope covers self-service intake on the Service Portal (/sp), dynamic Catalog UI Policy rules, data persistence in custom Database Tables (u_database_table), automated 10-step Flow Designer execution, approval governance, and outbound notification alerts.

2. Defect Analysis

This report outlines all identified issues, defects, and optimizations encountered during unit, functional, and acceptance testing, categorized by resolution type across Severity 1 (Critical) to Severity 4 (Cosmetic/Enhancement).

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
